

Celia Dagorne

Product Engineer | dagorne.celia@gmail.com | <https://celiadagorne.com/> | Berlin

Product Engineer with strong TypeScript, React and Next.js experience building customer-facing products in fast-moving teams. I take ownership from product and technical scoping through implementation and production, working across frontend, APIs and integrations to turn complex workflows into simple user experiences.

Work Experience

CleanHub - Berlin

Oct 2023 – Jan 2026

Front-End Engineer

- Owned customer-facing products and internal tools from technical scoping to production using TypeScript, Next.js and React.
- Built complex self-service onboarding and purchasing workflows across frontend, backend integrations, payments and business rules.
- Designed interfaces for operational data and internal workflows, turning complex product logic into clear user experiences.
- Worked directly with customers and cross-functional teams to clarify requirements, define trade-offs and iterate on solutions.
- Troubleshoot integrations across application code, REST APIs and client environments through to production resolution.

Freelance – Paris, Berlin, San Francisco

2017 – Present

Product Engineer

- Independently delivered web products for startups and businesses across Europe and the US, from scoping to launch and ongoing maintenance.
- Worked directly with clients to turn ambiguous needs into clear requirements, explain technical trade-offs and agree on priorities.
- Worked across diverse technologies and existing codebases, adapting to each project's requirements to build applications, e-commerce sites, CMS platforms and API integrations.

Upperquad – San Francisco

Jan 2019 – Dec 2019

Interactive Developer

- Built and shipped interactive web experiences for Google and Meta in fast-paced agency teams.
- Worked closely with designers and engineers to turn creative requirements into production-ready interfaces, balancing technical constraints, performance and delivery deadlines.

Selected Project

Studio Shots - AI product photography workflow

- Built a Slack-first workflow connecting product catalog data, AI generation and human review into a single approval flow.
- Implemented a PostgreSQL-backed system integrating AI APIs and webhooks, with retries, idempotency and persistent generation state.
- Designed a human-in-the-loop review flow, keeping generation, feedback and approvals visible and controllable by users.

Education

HETIC – Paris

2015 - 2020

Master's degree in Digital Engineering and Management

Skills

TypeScript, React, Next.js, Tailwind CSS, JavaScript, Node.js, PostgreSQL, REST APIs, GraphQL, Webhooks, AI API Integrations
Product Engineering, Frontend Architecture, Performance, Accessibility, Technical Scoping, Customer-Facing Engineering, Git
Python (currently learning)
